

Shaping and implementing environmental practices at the workplace

- ▶ Runa V Gudmarsdottir
- ▶ Rannís, Iceland
- ▶ 23.1.2026

Rannís - The Icelandic Centre for Research

- ▶ Supports **research, innovation, education and culture** in Iceland.
- ▶ Administers national **competitive funds**
- ▶ Coordinates and promotes Icelandic participation in **European and Nordic programmes**

27 national funds

8 international
programmes

>70 employees in
four divisions

Why an environmental strategy?

Strong interest in sustainability by staff

Public sector organisations in Iceland are required to adopt sustainable practices – The Green Step Initiative

As a National Agency for Erasmus+, Rannís is required to adopt sustainable practices to reduce its carbon footprint

Challenges and opportunities

- ▶ Remote location
- ▶ Sparsely distributed population

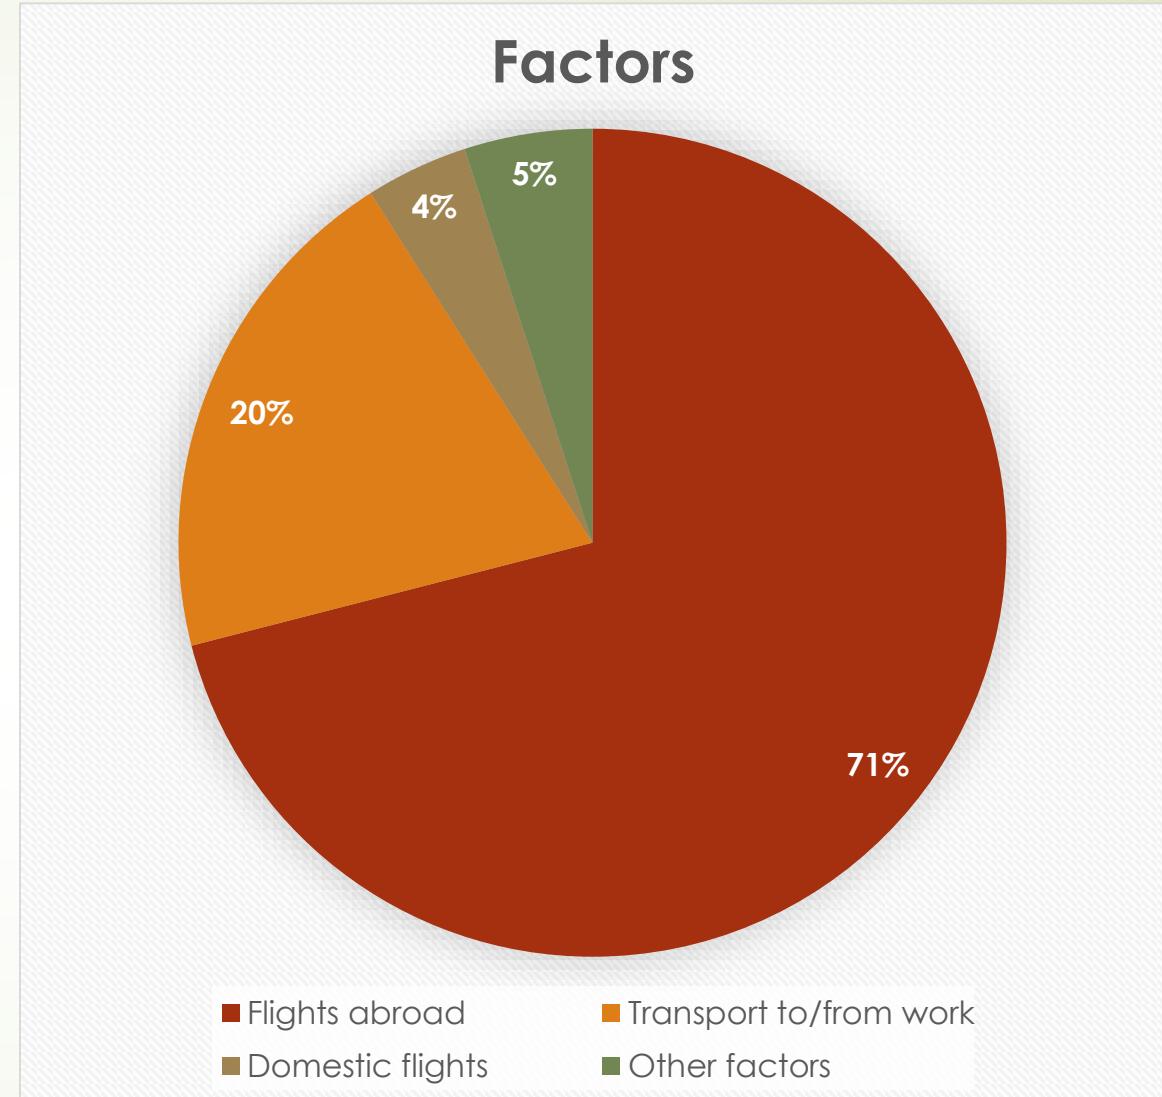

But..

- ▶ accessible and affordable low-carbon energy
- ▶ a strong national commitment to ambitious climate action

The process

- ▶ Internal working group established in 2020 to draft a climate policy and propose measures.
- ▶ Calculations show travel as major emission sources
- ▶ Policy and action plan discussed and approved at a staff meeting in 2022.

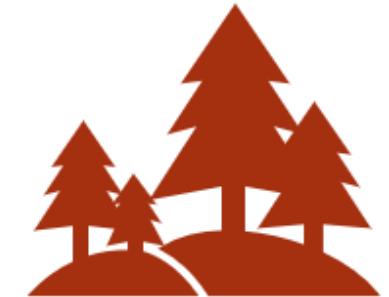

Policy objectives

Carbon Neutrality Goal

- ▶ To reduce CO₂ emissions by 50% by 2030
- ▶ Carbon offsetting for unavoidable emissions – cooperation with “Land and Forest Iceland”

Action Plan Measures:

- ▶ energy-saving
- ▶ waste reduction
- ▶ eco-friendly events
- ▶ sustainable travel policies

Travel Emission Reduction, including by:

- ▶ reducing car commuting so that fewer than 50% of staff drive to work
- ▶ decreasing business trips to 3.5–4 per FTE

How are we doing?

- ▶ Regular awareness-raising events for staff
- ▶ First and (almost) second Green Step sufficiently completed
- ▶ Notable progress in travel emissions:
 - ▶ Car use for commuting currently at 68% (was 77%)
 - ▶ 40% of staff signed up for commuting allowance
 - ▶ 3.9 trips abroad per FTE in 2024 (was 5.1)
- ▶ Most staff consider environmental impacts of their travel
- ▶ Clear policies on travel options and more transparency in trip decisions needed
